Generation

YOU HAVE NEVER BEEN SO CLOSE TO YOUR DATA!

Primarily, the SQL Cockpit supports your IT staff
to implement developments faster or to answer
support requests quicker and more
comprehensively.

THE ULTIMATE SQL EDITOR

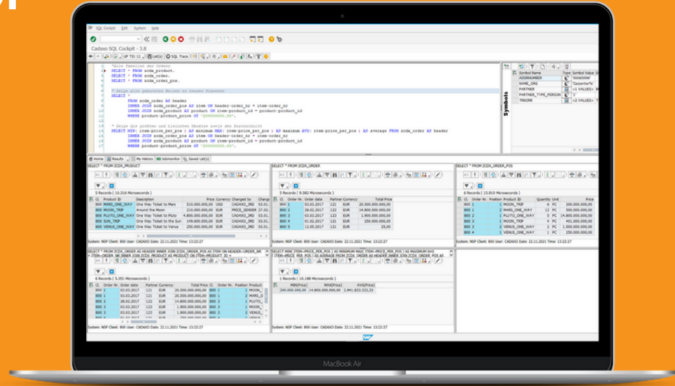

Our SQL Cockpit allows you to conveniently
analyze your data **directly in the system**.
Furthermore, our sophisticated authorization system
allows you to make **additional audit-proof
changes** (Changelog, System-Log, Solution
Manager, E-Mail, ...).

INSTALLATION AT THE PUSH OF A BUTTON

The software installation is done within less than 5
minutes - via SAP®-transportation request! The
SQL Cockpit is already pre-configured and ready
for immediate usage.

AUDIT-PROOF CHANGING OF YOUR DATA

The SQL Cockpit is a fully functional ABAP® Open SQL Editor. Maximum data security for your company is created by logged database changes and a sophisticated and extensive authorization concept!
